Mario Díaz González

Junior frontend developer · Logroño, Spain

mariodiaz2007@gmail.com · mk-1379.github.io · github.com/MK-1379 · LinkedIn

Second-year Web Application Development student in Logroño. What I enjoy most is frontend work: turning a design into a polished, responsive and accessible interface. I did my frontend internship at Globant and, on my own, shipped Bracketly and LoLStats, two React apps connected to my own Node.js backend.

Experience

Frontend intern, Globant GUT — Mar – May 2026

- Projects built with Vue.js, TypeScript and Tailwind CSS.
- Built responsive components and maintained interfaces, working in a team with Git.

Reception and access control, ALSE Servicios — Aug 2026

- Visitor reception, access control and admin support.

Projects

Bracketly Esports tournaments: invite-code sign-up and a bracket that updates itself. bracketly-mk.duckdns.org · code

- React, TypeScript and Tailwind interface: SVG bracket, animations that respect prefers-reduced-motion and a round-by-round mobile view.
- Bracket algorithm built with TDD. API with Express, Zod and Prisma on MySQL and login with a JWT in an httpOnly cookie.
- 69 tests with Vitest and Supertest and 11 Playwright E2E tests. It deploys itself once CI passes.

LoLStats My League of Legends stats, kept up to date on their own. lolstats-mk.duckdns.org · code

- React dashboard with TanStack Query and Recharts: rank, champions and match history with a per-match scoreboard.
- Express and Prisma backend that syncs my matches from the Riot API every 30 minutes. Docker on Oracle Cloud.

Kumafy JavaScript · Electron — Music player with a Web Audio visualizer, usable with keyboard and screen readers. 59 tests, Windows installer and web demo. github.com/MK-1379/kumafy

Technologies

Frontend: React, TypeScript, Vue, JavaScript, HTML, CSS, Tailwind CSS, TanStack Query, Three.js

Testing and tools: Vitest, Playwright, Git, GitHub Actions, Docker, Figma

Backend and data: Node.js with Express, Prisma, PHP, Java, MySQL / MariaDB, SQL Server

Education

Higher Vocational Diploma in Web Application Development, Jesuitas, Logroño — 2025 – present

Bachillerato, science and technology, IES Práxedes Mateo Sagasta, Logroño — 2023 – 2025
