Mario Díaz González

Junior web developer · Logroño, Spain

mariodiaz2007@gmail.com · mk-1379.github.io · github.com/MK-1379 · LinkedIn

Second-year Web Application Development student in Logroño. I did my frontend internship at Globant and, on my own, built and shipped Bracketly, an esports tournament manager, and LoLStats, a site with my League of Legends stats. Both run on my own server.

Experience

Frontend intern, Globant GUT — Mar – May 2026

- Project built with Vue.js, Nuxt, TypeScript and Tailwind CSS.
- Built responsive components and maintained interfaces, working in a team with Git.

Reception and access control, ALSE Servicios — Aug 2026

- Visitor reception, access control and admin support.

Projects

Bracketly Esports tournaments: invite-code sign-up and a bracket that updates itself. bracketly-mk.duckdns.org · code

- Single-elimination bracket with byes, built with TDD and drawn in SVG with React.
- API with Express, Zod and Prisma on MySQL. Custom login with bcrypt and a JWT in an httpOnly cookie.
- 69 tests with Vitest and Supertest and 11 Playwright E2E tests. It deploys itself once CI passes.

LoLStats My League of Legends stats, kept up to date on their own. lolstats-mk.duckdns.org · code

- A background job pulls my matches from the Riot API every 30 minutes.
- React, Express and Prisma on MySQL, with Docker on Oracle Cloud and HTTPS through Caddy.

Kumafy Electron — Desktop music player with an audio visualizer. Windows installer and web demo. github.com/MK-1379/kumafy

MediCita PHP · MariaDB — Medical appointments with doctor and patient roles. Hand-written MVC, no framework, prepared statements and bcrypt passwords. github.com/MK-1379/medicita

HospitalJDBC Java 21 · MySQL — Console app for doctors and patients, split into DAO layers. github.com/MK-1379/hospital-jdbc

Technologies
